

Alex Morgan

Data Engineer alex.morgan.demo@email.com | (555) 123-4567 | LinkedIn: /in/alexmorgan-demo | Location: Austin, TX

Summary

Data Engineer with 4 years of experience building batch and streaming data pipelines, designing warehouse schemas, and supporting analytics and ML teams. Comfortable owning pipelines end-to-end, from ingestion to orchestration to monitoring.

Skills

- **Languages:** Python, SQL, Bash
- **Orchestration:** Apache Airflow
- **Processing:** Apache Spark (PySpark), Pandas
- **Warehousing:** Snowflake, BigQuery
- **Cloud:** AWS (S3, Glue, Lambda, Redshift)
- **Other:** dbt, Docker, Git, basic Terraform

Experience

Data Engineer — Northwind Analytics

Jan 2023 – Present

- Built and maintained 15+ Airflow DAGs orchestrating daily ETL jobs from Postgres, Salesforce, and third-party APIs into Snowflake.
- Migrated a legacy batch job from Pandas to PySpark, cutting processing time from 4 hours to 40 minutes for a 200M-row dataset.
- Wrote dbt models to standardize revenue and customer metrics used by 3 downstream BI dashboards.
- Set up basic data quality checks (row count, null checks) using Great Expectations.

Junior Data Engineer — Ridgeline Retail Co.

Jun 2021 – Dec 2022

- Built ingestion scripts in Python to pull data from internal REST APIs into S3, partitioned by date for downstream Athena queries.
- Supported migration of an on-prem MySQL reporting database to AWS Redshift.
- Created and maintained internal documentation for pipeline runbooks.

Education

B.S. in Computer Science — University of Texas at Austin, 2021

Projects

- **Personal project:** Built a small end-to-end pipeline ingesting public weather API data into a Postgres database, visualized with a simple dashboard (Streamlit).
